DIFFRACTION RADIATION FROM RELATIVISTIC PARTICLES

Springer-Verlag GmbH Okt 2010, 2010. Buch Condition: Neu Neuware - This book deals with diffraction radiation, which implies the boundary problems of electromagnetic radiation theory. Diffraction radiation is generated when a charged particle moves near a target edge at a distance (γ - Lorentz factor, λ - wave length). Diffraction radiation of non-relativistic particles is widely used to design intense emitters in the cm wavelength range. Diffraction radiation from relativistic charged particles is important for noninvasive beam diagnostics and design of...

Reviews

This book will be worth purchasing. This is for anyone who states that there had not been a worthy of looking at. Your daily life span will likely be converted when you totally look over this ebook.

-- **Aidan Jerde DVM**

A really great publication with perfect and lucid explanations. Of course, it is a play, continue to an amazing and interesting literature. I discovered this book from my i and dad suggested this publication to find out.

Unquestionably, this is actually the greatest function by any writer we have gone through and so I am confident that I am going to go on reading through once more once again later on. I am just happy to explain how this is actually the very best book I have ever gone through during my individual existence and might be the greatest ebook for ever.
