Excerpt from Context Interchange: A Lattice Based Approach What exactly constitutes the context is difficult to answer lyo81. The concept of context has been addressed in many areas such as sensory process, perception, language, concept learning, recall and recognition bur52, Coe77, Tho88. The main reason for the context assuming a central role in these areas is that objects and their associated events constitute an integral part of their environment and cannot be understood in isolation of that environment. In this paper we do not attempt to give precise definition for this term, even though this is part of our long term research objective. We assume that context knowledge of a data item is a triple given by the semantic knowledge of the data, the organization of the data, and the quality parameters of the data. In this paper, we concentrate only on the semantic component of the context, which is formally defined in Section 3. Consider the process by which a financial analyst accesses the prices for shares of a particular company. He or she needs to gather information from several stock exchanges located...
