Not illustrated. 1899 Excerpt: .take place in the blood and certain new substances are produced in the tissues of the liver. The blood loses a portion of its elements, and not only is bile secreted but a kind of animal sugar is formed in the substance of the liver. These, with other changes, appear to be necessary to e.--Stomach. f.--The spleen, h, 1--The colon. PRACTICAL REVIEW. 205 the maintenance of health, and when disorders of the liver prevent their perfect performance, the entire system suffers. 319. Excretions from the Blood.--As the blood circulates it not only supplies the glands with the materials which compose their various secretions, but it delivers to the excretory organs such matters as are of no value to the system and must be expelled from it. A very large portion of this waste is carried to the lungs and by them expelled during the process of...
