Pan Stanford Publishing Pte Ltd, Singapore, 2011. Hardback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Science is fun! Is the motto of this fun-filled book by Prof Reinhard Renneberg. Do you know that in Japan, washing machines have no cooking program thanks to enzyme detergents? How to make German-style beer from rice? How do you make real snow with dead frost-bacteria? Is using bio-ethanol as a car fuel going against our environment? How can you clone your neighbor s beautiful cat? How to eliminate breast cancer genes before a baby girl is born? Can the financial crisis be solved by breeding better stock market traders? How to measure the fitness of students? The questions are endless. Cartoonists Manfred Bofinger (Germany) and Ming Fai Chow (Hong Kong) here together with Prof Renneberg, created a fireworks of stories with funny cartoons, which are easily digestible for the layman reader but at the same time will interest even the specialists. Through this collection of inspirational short stories, you will get a complete picture of the latest advances in modern biotechnology with no technical jargons, no equations and no animals harmed!.
