RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 56 pages. Original publisher: Washington : U. S. G. P. O. : For sale by the Supt. of Docs. , U. S. G. P. O. , 2007. LC Number: KF26 . V4 2006p OCLC Number: (OCoLC)86084765 Subject: Medicine -- Research -- United States. Excerpt: . . . 11 Platform Technology Centers that are national resources to develop computerized state-of-the art prosthetic limbs with the goal of using the latest advances in orthopedic surgery, tissue engineering, nanotechnology, and microelectronics to create prosthetics that look, feel, and act more like ones own limb. The Providence VA Medical Center, in collaboration with Brown University and the Massachusetts Institute of Technology, is working to develop a biohybrid limb that will use regenerated tissue, lengthened bone, internal and external implants and sensors to allow amputees to use brain signals and residual limb musculature to have better control of their limbs and reduce the discomfort and secondary complications associated with current prostheses. These researchers are already publishing and presenting about their work. The Advanced Platform Technology (APT) Center at the Cleveland VA Medical Center focuses on sensory and implanted control of prosthetic...
