## de Oblationibus Ad Altare Communibus, Peculiaribus, Dissertatio Historico-Theologica

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Original publisher: Cleveland, Ohio : National Aeronautics and Space Administration, Lewis Research Center ; Springfield, Va. : For sale by the National Technical Information Service, 1991 OCLC Number: (OCoLC)58970892 Excerpt: . . . from the unreinforced matrix alloy data especially for the specimen tested at the higher stress level. Comparison Between the Closure Models As was described previously, both models were successful in predicting the crack opening displacements and accounting for the effect of fiber bridging on the composite fatigue crack growth data in terms of a crack driving force parameter,  $AK_{ef}$ . However, for this particular study the fiber pressure model offers certain advantages over the shear lag model. One advantage is in the direct method of determining the closure pressure, no iterative solutions are required to determine the crack opening profile and the computing time is much shorter in comparison to the shear lag model. Also, for the fiber pressure model, the material and specimen parameters needed to perform the calculations can be obtained through standard means. On the other hand, the shear lag model requires previous knowledge of the interfacial frictional shear stress...

### Reviews

*Comprehensive information for book fanatics. it had been writtern really completely and useful. I am happy to explain how this is the greatest publication i have read through in my very own life and can be he finest pdf for ever.*

-- **Virginie Collier I**

*This publication may be really worth a go through, and a lot better than other. It really is full of knowledge and wisdom Its been printed in an exceptionally easy way in fact it is simply after i finished reading this publication by which basically modified me, affect the way i really believe.*

-- **Troy Dietrich DDS**
