Fats and Oils: Outlook and Situation; February 1981 (Classic Reprint) (Paperback)

By Economics and Statistics Service

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Fats and Oils: Outlook and Situation; February 1981 The estimation period for the model covered the to crop years. The R values indicate that the equations explained between 90 and 99 percent of the regional variation in soybean acreage over the his toric period, Table 1. Since the equations were estimated using data only through the crop year, one test of the validity of the model would be to compare the model s forecast of acreage planted in 1980 to the actual acreage planted. Summing the regional forecasts for 1980 resulted in a national forecast of million acres. Actual plantings were million acres. The model overestimated plantings by million acres or slightly less than two percent. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
