Paperback Pages Number: 293 Language: Simplified Chinese Publisher: Northwestern University Press; 1st edition (January 1. 2001). Book is written in accordance with the basic requirements of the Ministry of Education. Higher Technical School of theoretical mechanics teaching. It is part of the teaching bases of basic mechanics textbook series Theoretical Mechanics Engineering Dynamics. The book is a total of eight chapters. describes the kinematics of particle and rigid body dynamics . The book focus on the analysis of issues. ideas and methods to solve the problem applies to classroom teaching. The book can be used as the Ecole Polytechnique machinery. aviation. aerospace. marine. civil engineering. electromechanical and power and other types of professional theoretical mechanics course materials are also available for evening university. Open University Professional and related engineering and technical staff reference. Cartesian coordinate method of movement of contents: 1-1 engineering kinematics of kinematic basis of the first chapter of the project tasks and the concept of base 1-2 point movement vector France 1-3 points 1-4 points. movement of natural law 1-5 rigid body 1-6 rigid body fixed axis of rotation of 1-7 angular velocity and angular acceleration vector of France just body velocity and acceleration vector product a second point of the law exercises 2-1 The basic concept of the motor complex II. Chapter III of the 2-2 point synthesis theorem 2-3 implicated movement point in time for the translational acceleration composition theorem 2-4 implicated Movement for fixed axis rotation Acceleration Composition Theorem exercises plane motion of a rigid body 3-1 rigid body in plane decomposition 3-3 3-2 plane equation of motion graphics movement on the plane figure 3-6 rigid body acceleration of points on the 3-5...
