

Contemporary Physics and the Limits of Knowledge

Filesize: 5.96 MB

Reviews

*Extremely helpful for all group of men and women. it absolutely was writtern extremely perfectly and valuable. Your way of life span will be transform when you complete looking at this ebook.
(Prof. Trever Torphy)*

CONTEMPORARY PHYSICS AND THE LIMITS OF KNOWLEDGE

Rutgers University Press. Paperback. Book Condition: New. Paperback. 280 pages. Dimensions: 9.0in. x 6.2in. x 0.7in. An elegant read for anyone interested in understanding modern physics. Tavel has a genuine knack for making the difficult and obscure clear and exciting. --Joseph C. Pitt, author of *Thinking about Technology* You will never look at scientific theories in the same way again. --John Hubisz, North Carolina State University Introductory physics is not often a popular class among liberal arts majors. With its lively prose and analogies from the arts, humanities, and social sciences, however, *Contemporary Physics and the Limits of Knowledge* is guaranteed to enlighten and delight nonscience majors. Morton Tavel contends that every one of the six topics that he explores--symmetry, special and general relativity, statistical physics, quantum mechanics, and chaos--has played a role in telling us what we are unable to know about the physical world. He explains what each of the topics reveals about our attempts to pinpoint reality, and how each scientific revelation forces us to acknowledge a narrowing rather than a broadening of our knowledge. Chaos theory, for example, reveals a way to understand the randomness that seems so prevalent in natural phenomena such as weather. This development unifies our understanding of many phenomena that had been previously thought unrelated. Yet, chaos represents a significant diminution in what we can hope to predict about the course of natural events. It has increased our knowledge or understanding of a phenomena, but has seriously eroded our long-held, Newtonian vision of prediction and control. Tavel emphasizes the features of physics that make it a very human endeavor and serve to build bridges to all other intellectual disciplines. Morton Tavel is a professor of physics at Vassar College. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN....
