Reviews

This composed pdf is fantastic. It normally will not expense too much. You will like how the writer write this publication.
(Dr. Jerald Hansen)

DEFENSE MANUFACTURING TECHNOLOGY PROGRAM: MORE JOINT PROJECTS AND TRACKING OF RESULTS COULD BENEFIT PROGRAM: GAO-01-943

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.The Department of Defense (DOD) established the Defense Manufacturing Technology Program to develop and apply advanced manufacturing technologies to reduce the total cost and improve the manufacturing quality of weapon systems. By maturing and validating emerging manufacturing technology and transferring it to the factory floor, the program bridges the gap between technology invention and industrial application. The program, which has existed in various forms since the 1950 s, received about \$200 million in funding fiscal year 2001. DOD s Office of the Under Secretary of Defense provides guidance and oversight to the Army, Navy, Air Force, and the Defense Logistics Agency (DLA), but each establishes its own policies and procedures for running the program and determines which technologies to develop. Users told GAO that the program was responding to their needs by developing technologies, products, and processes that reduced the cost and improved the quality of weapons systems. To the extent practicable, DOD used competitive procedures to award the work done under the program. The Army, Air Force, and DLA competitively awarded most of the projects GAO reviewed for fiscal years 1999 and 2000, and the remaining non-competitive awards were based on documented sole source justifications. DOD is missing opportunities to conduct more joint programs and lacks effective measures of program success. Joint projects would enable the services to address the funding issue by leveraging limited funding and integrating common requirements and approaches for developing manufacturing technologies.
