A SYSTEM STUDY FOR RFID

Cuvillier Verlag Aug 2007, 2007. Taschenbuch. Condition: Neu. Neuware - RFID transponders that are based on polymer integrated circuits have the potential to be produced at high volume and low cost, due to the usage of soluble polymer semiconducting materials in printing processes. In this work, the concept of designing and simulating a passive polymer RFID transponder is presented. Models of the component and the overall RFID-system, consisting of the reader and the polymer transponder, are derived. Simulation and...
