Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Streamflow Responses to Road Building and Harvesting: A Comparison With the Equivalent Clearcut Area Procedure The Horse Creek administrative-research site is in the Nez Perce National Forest in north-central Idaho, about 35 miles east of Grangeville. Two third order streams, the Main and East Forks of Horse Creek, drain the area toward the east, entering Meadow Creek several miles upstream from its confluence with the Selway River. Within the Main Fork basin are 15 gauged first and second order watersheds, 10 on the north side of the Main Fork and five on the south side (fig. One watershed on each side of the Main Fork serves as an undisturbed control watershed. Roads have been constructed in 11 of the watersheds, and portions of four of these watersheds with roads have also been partially harvested. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
