paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback Pages Number: 227 Language: Chinese. Institutions of higher learning computer professionals the ability to train planning materials (type): Digital Logic (2nd Edition) discusses the basic theories and methods of analysis and design of digital logic circuits. Institutions of higher learning computer professionals ability to train planning materials (type): Digital Logic (2nd Edition) is divided into seven chapters. the main contents include: Introduction to digital logic. Boolean algebra. combinational logic circuits. synchronous sequential logic circuits. asynchronous sequential logic circuits. programmable logic devices. digital system design basis. The book describes the hardware description Language (zVHDL) and MAX + PLUS II software. easy readers application of computer software design and analysis of digital logic circuits. Book to ensure the clear concept introduced on the basis of one and two points in the theoretical part gives the corresponding example. to enhance the readers grasp of the digital logic circuit analysis and design of the basic theory and basic methods. which understanding of digital systems in the numerical calculation is the value for logic operation in this process. the timing logic operations. The book can be used as computer science and technology. computer network engineering. automatic control. electronic information. machinery and electronic information. Internet of Things engineering and application of professional undergraduate textbook. can be used as a computer. computer networks. automation. communications and electronic information reference book of scientific and technical personnel. Four Satisfaction guaranteed, or money back.
