

Fundamentals of Human Physiology: A Comparative Examination (Paperback)

Filesize: 3.74 MB

Reviews

This book is really gripping and fascinating. I really could comprehend almost everything using this published e book. I am just very easily can get a delight of reading a published publication.

(Kailey Pacocha)

FUNDAMENTALS OF HUMAN PHYSIOLOGY: A COMPARATIVE EXAMINATION (PAPERBACK)**DOWNLOAD**

Cognella Academic Publishing, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Fundamentals of Human Physiology: A Comparative Examination is written from a comparative perspective using examples from animal physiology to illustrate key principles and shed light on what is known about physiological mechanisms in humans. Over the course of ten chapters the book examines and describes these various mechanisms in detail. Fundamentals of Human Physiology begins with an introduction to histology and the organization of the body. It then goes on to focused explorations of cell, sensory, and muscle physiology, as well as neurophysiology. The text also covers the cardiovascular, respiratory, renal, and digestive systems. The final chapter is devoted to endocrinology. Students learn about cell structure and function, cell signaling, and transduction pathways. They explore the nervous system including somatic and visceral sensation. They become familiar with skeletal muscle, the heart and vascular systems, the lungs, and gas transport mechanisms. Each chapter concludes with a summary that support identification and retention of important concepts. Fundamentals of Human Physiology is well suited to undergraduate courses in human physiology or anatomy. M. Beth Zimmer, who earned her Ph.D. at the University of British Columbia, Vancouver, is a professor in the Department of Biological Sciences at Ferris State University where her course offerings include human anatomy and physiology, neurobiology, and current topics in biology. In addition to teaching, Dr. Zimmer is the biology research seminar coordinator and serves on multiple committees including the Academic Senate. Her professional writing has appeared in Respiratory Physiology and Neurobiology, the Journal of Spinal Cord Medicine, and Experimental Neurology.
