A DIGITAL POWER AMPLIFIER IN 28 NM CMOS FOR LTE APPLICATIONS

FAU University Press Nov 2016, 2016. Taschenbuch. Condition: Neu. Neuware - This book shows the development of a power amplifier for LTE at the edge of planar CMOS technology. It includes theoretical design concepts, simulations and measurements for a power amplifier based on uplink specifications for mobile communication defined by 3GPP. It proves the basic capability of CMOS technology for a full integration on a SoC. Different power amplifier classes and linearization concepts are summarized and compared. A special focus...
