

Selected Azo Compounds for the Determination of some Metal Ions

Filesize: 3.25 MB

Reviews

Thorough guide! Its this sort of very good study. Yes, it really is play, nonetheless an interesting and amazing literature. You may like the way the blogger create this ebook.

SELECTED AZO COMPOUNDS FOR THE DETERMINATION OF SOME METAL IONS

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Mathematical Basic equations for Normal and Derivative Spectrophotometric Determination of Metal ions | Spectrophotometric methods of analysis are an excellent tool, which are very widely used for determination of wide kinds of materials. These techniques are the most commonly used methods for metal analysis. Achievement of high accuracy and precision coupled with the cost effectiveness is the most important advantage of visual spectrophotometry. The challenge in this field of research is the development of newer reagents, which are comparatively stable. The investigation was aimed at establishing the complexation equilibria that exist in solution and at determining the basic characteristics of the complexes formed in solution. The proposed methods have been successfully applied to the determination of aluminium(III), manganese(II), iron(III), iron(II), nickel(II) and copper(II) in aluminium alloys, nonferrous alloy and multivitamins with minerals. Finally I tried to summarize in this thesis all the used equations for Normal and Derivative methods for spectrophotometric determination of any solute whatever metal ion or a drug . | Format: Paperback | Language/Sprache: english | 200 pp.
