Pages Number: 0 Publisher: China Social Sciences Publishing House Pub. Date :2009-07-01. This book reaffirms the traditional thinking of the theme is limited to the field of philosophy of technology. pushed to Chinese culture and traditional resources. interpretation of the grand narrative of Chinese development. China s population of the world population 15. it consumes half the world s cement. 13 steel and 14 aluminum. oil and copper is currently imports in 1999. respectively 35 times and 23 times. According to the International Energy Agency estimates that China s oil imports in 2030 is now 3 times. China s development in the process of resource consumption so strong that any country in the world can be said is a modern time-space compression. But this time-space compression is undoubtedly through the introduction of Western advanced technology to achieve. and this process not only consumption of natural resources. cultural resources also include the decline of traditional Chinese or damage. If this situation has been criticized as a not sustainable. then it would be to their own cultural traditions to inspire the...
