

## Supermode Si/III V Lasers and Circular Bragg Lasers

Filesize: 2.74 MB

### ***Reviews***

*Absolutely essential read through pdf. it was actually writtern extremely flawlessly and valuable. You will like how the writer publish this book.*

## SUPERMODE SI/III V LASERS AND CIRCULAR BRAGG LASERS

To save **Supermode Si/III V Lasers and Circular Bragg Lasers** PDF, make sure you click the web link beneath and save the document or have accessibility to additional information that are relevant to SUPERMODE SI/III V LASERS AND CIRCULAR BRAGG LASERS book.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The Ideal On-Chip Integrable Light Sources for Next-Generation Optical Communication | This book addresses topics of semiconductor lasers and photonic integration. Optical communication has the higher capability of handling high-rate data processing and transmission. As efficient light emitters, the III V materials (GaAs, InP, etc.) naturally lend themselves to integration with Si, which is already the established platform for electronic integration. Part I of this book reviews the state of the art of this technology and presents the research on a novel mode-control method to the Si/III V hybrid lasers to enhance the modal gain, which makes for more efficient and, most importantly, shorter devices that may hold the key to the photonics electronics integration. Part II of this book discusses circular Bragg lasers, which with an inherent large emission aperture can produce high output power with good beam quality. Their theoretical formulation is elaborated. The analytical and numerical mode-solving methods are described, followed by near- and above-threshold modal analyses and design guidelines. This book would be of interest to researchers and academics working on semiconductor lasers, integrated optics, and related areas. | Format: Paperback | Language/Sprache: english | 120 pp.
