OMNIDIRECTIONAL VISION SYSTEMS: CALIBRATION, FEATURE EXTRACTION AND 3D INFORMATION

Springer. Paperback. Condition: New. 122 pages. Dimensions: 9.2in x 6.1in x 0.3in. This work focuses on central catadioptric systems, from the early step of calibration to high-level tasks such as 3D information retrieval. The book opens with a thorough introduction to the sphere camera model, along with an analysis of the relation between this model and actual central catadioptric systems. Then, a new approach to calibrate any single-viewpoint catadioptric camera is described. This is followed by an analysis of existing methods...
