Reviews

This publication is really gripping and exciting. It really is basic but unexpected situations in the 50 % in the book. It is extremely difficult to leave it before concluding, once you begin to read the book.

Not illustrated. 1903 Excerpt: .Scioto River and its tributaries, but the northern portion, in the vicinity of California Flats, and the area extending thence northward to the Scioto at Waverly, are very perfectly preserved. Its features may easily be observed from the train on the Ohio Southern Railroad at Beaver. Between the Ohio at Wheelersburg and the Scioto at Waverly this floor has at present at least five water partings across it, which is suggestive of the great length of time which has elapsed since its abandonment and the establishment of the present drainage. The elevation of the valley floor where it is cut by the Scioto Valley is, as near as can be estimated, about 600 feet above tide. This would make a grade of about 0 inches to the mile between St. Albans, W. Va., and this point, a distance of about 100 miles. As indicated in the articles above referred to, the topographic features of the California Valley are quite identical with those of the Teays and Flatwoods valleys, and the history of the cycles through which this region has passed is also exactly similar to that of the other valley. North of the Winfield-Crown City-Marion divide the remnants of the old valley floors are much more numerous than in the section to the south, as previously mentioned, and their discussion will be taken up in connection with their relation to the present drainage lines, and their correlations suggested in order. In the divide separating the waters...
