VAPOR-LIQUID EQUILBRIUM BEHAVIOR OF TETHERED NANOPARTICLES

Siladitya Mukherjee
Vapor-Liquid Equilibrium
Behavior of Tethered
Nanoparticles

LAP Lambert Academic Publishing Jun 2013, 2013. Taschenbuch. Condition: Neu. Neuware - In this work, molecular simulations are used to calculate the vapor-liquid equilibrium (VLE) of polymer-grafted nanoparticles under a wide range of conditions. Brownian dynamics simulations are performed using coarse-grained model, generic enough to be applicable to a wide range of systems. The VLE is calculated using the quench molecular dynamics technique. This work demonstrates a strong connection between the VLE and the grafting architecture. The role of graft...

Reviews

An incredibly wonderful ebook with perfect and lucid explanations. I really could comprehend every little thing using this written e publication. It is extremely difficult to leave it before concluding, once you begin to read the book.
