

Contributions to the Comparative Myology of the Chimpanzee (Classic Reprint) (Paperback)

By Burt G Wilder

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Contributions to the Comparative Myology of the Chimpanzee Levator claviculae (tyson), Trachelo-clavicular, or Tra chelo-acromialis. This muscle is not found in man, but appears to exist under some form in most of the lower animals. In this specimen it was quite strong, but I did not see its origin, which is generally from the transverse processes of some of the upper cervical vertebrae. Serratus magnus. Composed of two fleshy parts, with an intervening thin portion. The superior part seemed to arise from the first and third ribs, thence becoming wider, to be inserted into about an inch of the upper angle and posterior border of the scapula. The inferior portion is much larger, arising from the eight ribs below the third, thence narrowing to its insertion into the lower angle and part of the posterior border of the scapula, without any tendon. I did not see that the intervening thin portion was anything more than a thin membrane. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Reviews

Undoubtedly, this is the best function by any writer. This really is for those who state there was not a really worth reading. Its been written in an exceptionally basic way which is merely right after i finished reading through this book by which really transformed me, change the way i really believe.
