HOW TO GROW QUEENS

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 26 pages. Dimensions: 9.0in. x 6.0in. x 0.1in. Northern beekeepers tell me that even by using my system they cannot profitably afford to grow their own queens because this takes time, bees and equipment that they can more profitably use in the production of honey. Probably most of the queens will always be produced in the south because there queen rearing operations start in early March and continue through October. The early queens are used largely with package bee shipments and by late May there is a surplus of queens that can be sold cheaper than the northern breeders can afford to produce them. Now with air mail rapidly extending its services throughout the country...
