

Distributed Constrained Optimization with Semicordinate Transformations

Filesize: 5.92 MB

Reviews

Comprehensive information for book lovers. This is for all who stutte that there had not been a worth studying. Its been printed in an remarkably simple way which is simply following i finished reading through this pdf where actually modified me, change the way i think. (Rebekah Smith)

DISTRIBUTED CONSTRAINED OPTIMIZATION WITH SEMICORDINATE TRANSFORMATIONS

To download **Distributed Constrained Optimization with Semicordinate Transformations** PDF, remember to refer to the hyperlink beneath and save the document or get access to other information which might be related to DISTRIBUTED CONSTRAINED OPTIMIZATION WITH SEMICORDINATE TRANSFORMATIONS ebook.

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.Recent work has shown how information theory extends conventional full-rationality game theory to allow bounded rational agents. The associated mathematical framework can be used to solve constrained optimization problems. This is done by translating the problem into an iterated game, where each agent controls a different variable of the problem, so that the joint probability distribution across the agents moves gives an expected value of the objective function. The dynamics of the agents is designed to minimize a Lagrangian function of that joint distribution. Here we illustrate how the updating of the Lagrange parameters in the Lagrangian is a form of automated annealing, which focuses the joint distribution more and more tightly about the joint moves that optimize the objective function. We then investigate the use of semicordinate variable transformations. These separate the joint state of the agents from the variables of the optimization problem, with the two connected by an onto mapping. We present experiments illustrating the ability of such transformations to facilitate optimization. We focus on the special kind of transformation in which the statistically independent states of the agents induces a mixture distribution over the optimization variables. Computer experiment illustrate this for sat constraint satisfaction problems and for unconstrained minimization of NK functions.
