Indian region has 31 families of terrestrial Mammalia. IV. Australian region has 14 families of terrestrial Mammalia. V. Neotropical region has 26 families of terrestrial Mammalia. VI. Nearctic region has 23 families of terrestrial Mammalia. Classification Of Animals. The first attempt at the classification of animals was made by Aristotle (384-322 B.C.), the father of Zoology. Crude and indefinite though it was, yet it became the starting point of the truly elaborate presentday system of animal grouping. Aristotle s History of Animals, in nine books, displays a wonderful knowledge of external and internal structure, habits, instincts, and uses. Aristotle clearly recognized many of the more important animal groups. Vertebrata are spoken of as animals with blood, and Invertebrates as animals without blood, colorless blood not being recognized...

Reviews

This sort of pdf is every little thing and made me seeking forward and a lot more. This is certainly for all who statte that there was not a worth reading through. I found out this book from my dad and i recommended this publication to discover.

-- **Christopher Kozey**

Undoubtedly, this is the best function by any writer. This really is for those who statte there was not a really worth reading. Its been written in an exceptionally basic way which is merely right after i finished reading through this book by which really transformed me, change the way i really believe.
