Effect of Micronutrient in
Banana

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Banana is the world's largest monoecious, monocarpic, monocotyledonous perennial herbs belonging to the family Musaceae. Banana is a heavy feeder of nutrients which is due to their size, growth rate, rooting pattern and phenomenon of bud differentiation which have relationship in the yield. Micronutrient like copper, boron, zinc etc. has immense nutritional importance for the growth and development of banana. Micronutrients also act as new cell developer in meristematic tissue, fruit and seed...
