

Cabbage

By Frederic P. Miller

Alphascript Publishing Dez 2009, 2009. Taschenbuch. Book Condition: Neu. 220x150x7 mm. Neuware - High Quality Content by WIKIPEDIA articles! The cabbage is a popular cultivar of the species *Brassica oleracea* Linne (Capitata Group) of the Family Brassicaceae (or Cruciferae), and is used as a leafy green vegetable. It is a herbaceous, biennial, dicotyledonous flowering plant distinguished by a short stem upon which is crowded a mass of leaves, usually green but in some varieties red or purplish, which while immature form a characteristic compact, globular cluster (cabbagehead). The plant is also called head cabbage or heading cabbage, and in Scotland a bowkail, from its rounded shape. The Scots call its stalk a castock, and the English call its head a loaf. It is in the same genus as the turnip *Brassica rapa* L. Cabbage leaves often display a delicate, powdery, waxy coating called bloom. The sharp or bitter taste sometimes present in cabbage is due to glucosinolate(s). Cabbages are also a good source of riboflavin. 124 pp. Englisch.

This ebook will be worth acquiring. It is actually writter in basic phrases instead of hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.
