

Evolutionary Exploration: Explore Experiment Learn Apply Evolve Share (Paperback)

By Bogdan Heretoiu

Createspace Independent Publishing Platform, 2010. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Evolutionary Exploration is about us, a few billion entities built in as many unique and unrepeatable molecular configurations, the result of countless evolutionary steps - powerful through our potential, yet rendered feeble through our conventional education. Structured in theoretical and practical sections, this book presents a framework of individual experiential research for accessing various brain processes, and reveals how we can use our brain as a subject of exploration, as well as the instrument of exploration. We cannot assume that we could continue our evolutionary journey as human beings, as long as we remain steeped into superstition, mysticism, and the conditioning of any belief system. Evolutionary exploration is a personal journey of uncompromised honesty which can only begin by assuming full responsibility for our choices and actions, and, it continues through an ongoing process of learning and applying ourselves in a functional, non-abstract way. This book invites the reader to a natural way of functioning - from an experiential point of view rather than from a human-made interpretative perspective - while also providing ways to apply its basic principles to our...
