

Optical Supercomputing

By S. Dolev

Springer-Verlag GmbH Aug 2008, 2008. Taschenbuch. Book Condition: Neu. 242x156x10 mm.

Neuware - OCS, the International Workshop on Optical SuperComputing, is a new annual forum for research presentations on all facets of optical computing for solving hard computation tasks.

Optical computing devices have the potential to build the very next computing infrastructure. Given the frequency limitations and cross-talk phenomena, as well as the soft-errors, of electronic devices on one hand, and the natural parallelism of optical computing devices, as well as the advances in fiber optics and optical switches, on the other hand, optical computing is becoming increasingly marketable. The focus of the workshop is on research surrounding the theory, design, specification, analysis, implementation, and application of optical supercomputers. Topics of interest include, but are not limited to: design of optical computing devices; electro-optics devices for interacting with optical computing devices; practical implementations; analysis of existing devices and case studies; optical and laser switching technologies; applications and algorithms for optical devices; and alpha practical, x-rays and nano-technologies for optical computing. The First OSC workshop was held on August 26th, 2008, in Vienna, Austria, co-located with the 7th International Conference on Unconventional Computing. This volume contains eight contributions selected...

Reviews

Good eBook and beneficial one. It really is simplified but unexpected situations from the 50 percent from the ebook. You can expect to like the way the blogger publish this ebook.

-- **Bridie Stracke DDS**

It in a single of my personal favorite pdf. It really is written in basic words instead of hard to understand. Your daily life period will be transform as soon as you complete looking over this pdf.
