## From the Mind to the Feet: Assessing the Perception-to-Intent-to-Action Dynamic (Paperback)

By Lawrence A. Kuznar, Sarah Canna, Air University Press

Books Express Publishing, United Kingdom, 2011. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. The 12 essays in this volume examine the concept of intent in defense, security, and foreign-policy contexts. They provide operational and academic perspectives on measuring the intent of adversaries, including nation-states and nonstate actors, and understanding the relationship of intent to behavior. The essays apply the insights and methods of multiple disciplines-anthropology, psychology, political science, neuroscience, and others-to the study of intent, for which there is currently no coherent body of research. As Lt Gen Robert Elder, USAF, retired, notes, we are good at estimating an adversary s capabilities but not as good at estimating his intent. To influence an adversary s behavior, we must understand the perception-to-intent-to-action dynamic that underlies his behavior. This collection of essays, which emerged from a Department of Defense Strategic Multilayer Assessment, provides perspectives for doing so. The authors represent multiple agencies and fields of study; some are academics, and some are military subject-matter experts. Their expertise includes decision and behavioral analysis, social psychology, warfare and military strategy, political behavior, applications of neuroscience to behavioral studies, foreign policy, and antiterrorism.
