

## Novel III-Nitride Devices and Engineering for Solid-state Lighting

By Hui, Kwun Nam

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Engineering light-emitting diodes for microdisk lasers, white LEDs, and color-tunable LEDs | Over the last decade, the research on III-Nitrides semiconductor materials has increased exponentially, and engineering the III-Nitrides semiconductor materials for energy efficient laser and solid-state lighting are among the most exciting activities in nitride-based research and development area. Conventional methods of producing nitride-based laser are complicated and lack of viable approach for large scale production. Regarding existing technologies for solid-state white light sources, especially, white and color-tunable LEDs, they are suffered from severe patent issues. This book, therefore, provides new methods of engineering nitride-based materials for novel microdisk lasers and solid-state white and color-tunable light sources, with a simple, fast and mass production process. Three separate, distinctly different approaches of fabricating novel nitride-based devices are outlined. This study should help shed some light on these new and exciting nitride-based semiconductor materials, and should be especially useful to professionals in solid-state lighting fields, or anyone else who may be considering as newcomers in the GaN field. | Format: Paperback | Language/Sprache: english | 180 gr | 220x150x6 mm | 108 pp.

### Reviews

*This publication is definitely not effortless to get going on looking at but really exciting to read through. It really is rally intriguing throug looking at time period. Its been written in an remarkably straightforward way which is just soon after i finished reading through this book where basically altered me, change the way i think.*

-- **Erna Langosh**

*The ebook is easy in read through preferable to understand. It is actually writter in straightforward words and never hard to understand. I realized this publication from my dad and i encouraged this ebook to understand.*
