Forgotten Books, United States, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Methodological Appraisal of the Follow Up Instruments Used in Evaluating Hillsborough County s Ceta Programs This report addresses common methodological problems facing survey researchers. The design of a valid and reliable instrument for the collection of social science data is a necessary first step to survey research. Unfortunately, not enough attention is usually given to issues of experimental design. The use of a control group for comparisons with an experimental or treatment group greatly enhances the utility of a survey instrument. In the usual case, that is, a one-group pretest-post-test Design, several major threats to internal validity arise. These include the effects of history, maturation, testing, instrument decay, and statistical regression. By introducing a control group and using a randomization procedure for the assignment of study groups, these threats are controlled. Further, the introduction of the control group allows for a more meaningful analysis of relationships. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
