

Opere Edite Ed Inedite (5)

Filesize: 2.55 MB

Reviews

This publication may be really worth a go through, and a lot better than other. It really is full of knowledge and wisdom Its been printed in an exceptionally easy way in fact it is simply after i finished reading this publication by which basically modified me, affect the way i really believe.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 20 pages. Original publisher: Greenbelt, Md. : National Aeronautics and Space Administration Goddard Space Flight Center ; Springfield, Va. : For sale by the National Technical Information Service, 1990 OCLC Number: (OCoLC)61710926 Excerpt: . . . -14-The second part of this investigation dealt with the interaction of orographic forcing and synoptic scale processes. One aspect of this work was the development of a linearized version of the NASA GCM, this based upon a request from Dr. E. Kalnay, then head of the Modeling and Simulation group. This work was carried out by R. B. Pierce as part of his MS and Ph. D. work, and was supported largely by a graduate student researchers grant NGT-50-002-302, and was also done in close collaboration with Dr. Dean Duffy and the staff of the Modelling and Simulation group at Goddard. A linear version of the Goddard laboratory for the Atmospheres General Circulation Model was developed to investigate the linear and nonlinear stability of a baroclinic zonal mean flow to small amplitude perturbations. The simulations replicated experiments conducted by Simmons and Hoskin jet at 30 degrees latitude. Simmons and Hoskins most unstable mode were considered, namely; wave number eight perturbations. Differences between the linear and nonlinear adjustment, and early development of a single baroclinic wave were considered. Comparisons were made between linear and nonlinear phase speeds, growth rates, structure, and transport properties of the disturbances. Slight differences between the linear and nonlinear growth rates and phase speeds were found. Linear waves had larger phase speeds and smaller growth rates than the nonlinear waves. The differences were attributed to nonlinear advective processes, which allowed the perturbations to influence the phase speed and phase relationships of the disturbances. By maximizing the phase difference between...
