

Graduation of Mortality and Other Tables (Classic Reprint) (Paperback)

By Robert Henderson

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Graduation of Mortality and Other Tables Statistics of various kinds for successive calendar years belong to the class of serial statistics. In mortality statistics in particular an analysis of death claims by cause of death would be an example of non-serial statistics, whereas an analysis of the same claims by attained age or by duration of insurance would be an example of serial statistics. Tables of the kind just described showing the relative frequency with which different values of the characteristic used as the basis of analysis appear in a given group of individuals are called frequency distributions. If the events occur only at isolated values of the variable they may be represented graphically by using the variable as abscissa and erecting ordinates proportionate to the frequencies at those points. Such a diagram would be used, for example, to show how many heads appear in a fixed number of tosses of a coin in a series of such experiments. It is customary to render the outline of the diagram more readily visible by joining the ends of the ordinates by straight...
