By Fred B Jacobs

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Production Grinding Large multiples. In the automobile, motor truck, agricultural and similar industries, production grinding has increased output and has effected economies never before attained by other machining methods. Large production and precision are not generally associated as being practically obtainable, but the cutting of metals by grinding makes this possible. The Operations illustrated and discussed in this work represent the highest development of production and precision grinding practice. Every method presented has been subjected to the test of successful commercial manufacture involving big output accurately produced at proportionately low costs. A large part of the data contained herein originally was published in Abrasive Industry, but in its classification for the purpose of this text book a careful selection of methods was made to insure the inclusion of every phase of production grinding. As a reference work for abrasive and grinding engineers, grinding room foremen and operators it will serve as a standard of the best latter-day practice. It points out how many classes of work can be ground advantageously and it will prove of...
