J8 2004a OCLC Number: (OCoLC)56627209 Subject: Artificial satellites in telecommunication -- Law and legislation -- United States. Excerpt: . . . 15 new rate on January 1, 2005, to account for increases in the cost of living from 2000 through 2004 and to adjust that rate on January 1st of each year starting in 2007. CBO estimates that, taken together, these changes would increase revenues by 40 million in 2005, 459 million over the 2005 - 2009 period, and 557 million over the 2005 - 2014 period. With higher royalty collections, the payments to copyright owners also would increase. Historical spending patterns indicate that copyright holders may receive the fees and interest several years after the Copyright Office has collected the revenues. Thus, CBO estimates a significant lag between increases in revenue collections and higher payments to copyright holders. CBO estimates that increases in direct spending resulting from increases in royalty collections (and interest on those collections) would be negligible for the next few years but would total 48 million over the 2005 - 2009 period and 582 million over the 2005 - 2014 period. Interest on Copyright Royalties H. R. 4518 would result in additional spending because all revenues are eventually paid to copyright holders with interest. Therefore, under the bill, budget authority for spending associated with royalty collections would be slightly higher than revenues associated with those collections. Satellite Retransmission of Distant and Local Signals According to the Federal Communications Commission (FCC), about 20 million households subscribe to satellite television service in the United States. Under current law, satellite companies are permitted to retransmit signals originally broadcast by television stations back into the same area...
