Von Arnim, Steiner's original contribution to human knowledge was based on his ability to conduct spiritual research, the investigation of metaphysical dimensions of existence. With his scientific and philosophical training, he brought a new systematic discipline to the field, allowing for conscious methods and comprehensive results. A natural seer from childhood, he cultivated his spiritual vision to a high degree, enabling him to speak with authority on previously veiled mysteries of life. Topics include: psychological cognition; the social question; the social question and theosophy; Memoranda of 1917; the metamorphosis of intelligence; culture, law, and economy; and Central Europe between East and West.
