PET CT APPLICATIONS IN NON-NEOPLASTIC CONDITIONS (PAPERBACK)

New York Academy of Sciences, United States, 2011. Paperback. Condition: New. New. Language: English . Brand New Book. PET-CT imaging is a powerful tool in diagnosis and treatment of cancer. Its application as a prognostic tool in various malignancies is well established. This volume encompasses the latest trends and developments of PET-CT imaging in non-neoplastic disease along with its application in clinical decision-making. This volume will be of interest to internal medicine specialists and subspecialists, as well as neurologists, psychiatrists, general radiologists and Nuclear Medicine physicians. Topics include: * PET myocardial perfusion imaging as an accurate and non-invasive means in the evaluation of ischemia and the assessment of myocardial viability as well as the potential for myocardial blood flow quantification * The use of PET imaging in the early diagnosis and timely intervention in potentially devastating dementias * The utility of PET imaging in the diagnosis of a variety of inflammatory diseases such as lupus and myositis NOTE: Annals volumes are available for sale as individual books or as a journal. For information on institutional journal subscriptions, please visit ACADEMY MEMBERS: Please contact the New York Academy of Sciences directly to place your order (Members of the New York Academy of Science receive full-text access to the Annals online and discounts on print volumes.
