From Biped to Strider: The Emergence of Modern Human Walking, Running and Resource Transport

By -

Springer. Paperback. Condition: New. 213 pages. Dimensions: 9.8in. x 6.6in. x 0.5in. The inspiration for this volume of contributed papers stemmed from conversations between the editors in front of Chuck Hilton's poster on the determinants of hominid walking speed, presented at the 1998 meetings of the American Association of Physical Anthropologists (AAPA). Earlier at those meetings, Jeff Meldrum (with Roshna Wunderlich) had presented an alternate interpretation of the Laetoli footprints based on evidence of midfoot flexibility. As the discussion ensued we found convergence on a number of ideas about the nature of the evolution of modern human walking. From the continuation of that dialogue grew the proposal for a symposium which we called From Biped to Strider: the Emergence of Modern Human Walking. The symposium was held as a session of the 69th annual meeting of the AAPA, held in San Antonio, Texas in 2000. It seemed to us that the study of human bipedalism had become overshadowed by the often polarized debates over whether australopithecines were wholly terrestrial in habit, or retained a significant degree of arboreality. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

This pdf is so gripping and exciting. I actually have to go through it and that I am confident that I will go to read it once again in the future. I discovered this publication from my dad and I advised this ebook to discover.

-- **Mr. Elwin McGlynn Jr.**

This pdf is very gripping and fascinating. We have read it and that I am certain that I am going to go to read it once more again in the future. Once you begin to read the book, it is extremely difficult to leave it before concluding.
