

## Coding Theory and Algebraic Geometry: Proceedings of the International Workshop Held in Luminy, France, June 17-21, 1991

By -

Springer. Paperback. Book Condition: New. Perfect Paperback. 232 pages. Dimensions: 9.2in. x 6.1in. x 0.6in. About ten years ago, V. D. Goppa found a surprising connection between the theory of algebraic curves over a finite field and error-correcting codes. The aim of the meeting Algebraic Geometry and Coding Theory was to give a survey on the present state of research in this field and related topics. The proceedings contain research papers on several aspects of the theory, among them: Codes constructed from special curves and from higher-dimensional varieties, Decoding of algebraic geometric codes, Trace codes, Exponential sums, Fast multiplication in finite fields, Asymptotic number of points on algebraic curves, Sphere packings. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Perfect Paperback.

### Reviews

*It is one of the best pdf. It is written in straightforward words and never difficult to understand. It has been designed in an extremely straightforward way and it is just following it finished reading this book through which basically modified me, affect the way i believe.*

-- **Deonte Abbott III**

*Basically no words to describe. It is filled with knowledge and wisdom I am just pleased to let you know that this is actually the greatest publication i have read within my individual lifestyle and may be the best publication for at any time.*

-- **Prof. Ron Gaylord II**
