University Press of Florida, United States, 2016. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Fritz Muller (1821-1897), though not as well known as his colleague Charles Darwin, belongs in the cohort of great nineteenthcentury naturalists. In Darwin s Man in Brazil, David A. West recovers Muller s legacy. He describes the close intellectual kinship between Muller and Darwin, detailing a lively correspondence spanning seventeen years, in which the two men often discussed new research topics and exchanged ideas. Darwin frequently praised Muller s powers of observation and interpretation, counting him among those scientists whose opinions he valued most. A free thinker who refused to sign the Christian oaths required of teachers in Prussia, Muller emigrated to Brazil in 1852 to become a pioneer farmer researching tropical biology. In the 1860s he reorganized his biological research in order to test Darwin s theory of evolution. Conducting field studies to answer questions generated from a Darwinian perspective, Muller was unique among naturalists testing Darwin s theory of natural selection because he investigated an enormous diversity of plants and animals rather than a relatively narrow range of taxa. Despite the importance and scope of his work, however, Muller is known for relatively few of his discoveries. West remedies this oversight, chronicling the life and work of this remarkable and overlooked man of science.
