An applied approach to carbo and sulfo analogues of polybetaine system

By Nazia Tarannum

LAP Lambert Academic Publishing Jan 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x11 mm. This item is printed on demand - Print on Demand Neuware - This book focuses on the synthesis of novel representatives of sulfobetaine and carbobetaine polymers. Their synthesis, characterization and applications as photoluminescent material, biocompatible material and in analytical chemistry are presented here. A series of 7 copolymers is synthesized and presented in this book. Chapter 1 presents a relevant description of the state of art through literature survey. The synthesis, physical properties, characterization techniques and various experimental procedures are presented in chapter 2. Chapter 2 incorporates thermal degradation characteristics and antibacterial properties of these polymers. One of the sulfobetaine polymer showed photoluminescence characteristics which was studied in steady state as well with varying time domain and results are discussed in chapter 3. One of the polycarbobetaine was crosslinked with a diacrylate crosslinker and a series of gel was synthesized and studied in detail for their swelling characterization and their results are discussed in chapter 4. Chapter 5 and 6 deals with representatives of polybetaine tested as a novel polymer format for molecular imprinting of L-aspartic acid and baclofen drug. 188 pp. Englisch.

Reviews

An incredibly awesome pdf with perfect and lucid explanations. I have read through and that i am confident that i am going to gonna read yet again yet again in the foreseeable future. I am quickly can get a delight of reading a created book.

-- **Mr. Johnson Hane**

Complete guideline! Its this kind of good read. It can be writer in easy terms rather than difficult to understand. I am delighted to tell you that here is the very best book i have got go through during my very own lifestyle and might be he greatest ebook for at any time.
