Ho Math Chess, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This workbook is aimed at math contests preparation for grades 1 and 2 and has a separate answer book. All contents are in English except some headings for selling in China. Only the knowledge of basic chess moves is needed in solving some of the math puzzles. The chess moves can be easily learned in a few minutes with my invention of Symbolic Chess Language (SCL) which shows what you see is what you move. There are not many math contests for grades 1 and 2. The main reason, I think, is the limited math computation ability of lower grades students. Many North American students will not learn multiplication until grade 3, but many Asian countries and areas learn times table at grade 2, so there is one year of the difference of learning ahead in China. This workbook has brought its standard to meet the highest possible math curriculum in the world, so four operations of computation appear in this workbook. The earlier the students could master the skills of four basic operations, the more the students could explore many possibilities of word problem computation problems. How does the very popular Math Kangaroo Contest test the grade 1 and grade 2 students? How is it different from other math contests? The Math Kangaroo grades 1 and 2 Contest almost does not include the direct math computation problems which are very different from the math contests in China where direct computation problems could include skilful computation problems. I analyzed the most recent years of Canadian Math Kangaroo Contest grade 1 and 2 problems and they start to emerge some characteristics and categories, so I include here to help students prepare for it....
