## **Reviews**

*Definitely one of the better ebook I have possibly read through. It usually will not charge excessive. You wont feel monotony at anytime of your own time (that's what catalogues are for regarding if you check with me).*

Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.These are the proceedings of international conference on Numerical Astrophysics 1998 (NAP98), held at National Olympic Memorial Youth Center, in Tokyo, Japan in the period of March 10 - 13, 1998, and hosted by the National Astronomical Observatory, Japan (NAOJ). In the last decade numerical simulations have grown up as a major tool for astrophysics. Numerical simulations give us invaluable information on complex systems and physical processes under extreme conditions which can be neither realized by experiments nor directly observed. Super-computers and special purpose computers may work as very large telescopes and special purpose telescopes for theoretical astrophysics, respectively. Numerical astrophysics ranks with other tool-oriented astronomy such as radio astronomy, infrared astronomy, ultraviolet astronomy, X-ray astronomy, and ) -ray astronomy. This conference, NAP98, was planned to explore recent advances in astrophysics aided by numerical simulations. The subjects of the conference included the large-scale structure formation, galaxy formation and evolution, star and planets formation, accretion disks, jets, gravitational wave emission, and plasma physics. NAP98 had also sessions on numerical methods and computer science. The conference was attended by 184 scientists from 21 countries. We enjoyed excellent talks, posters, videos, and discussions: there are 40 oral presentations, 96 posters and 16 video presentations. We hope that these proceedings and accompanying CD-ROM replay the friendly but inspiring atmosphere of the conference. Softcover reprint of the original 1st ed. 1999.
