

Smithsonian Miscellaneous Collections Volume 67, No. 6

By Smithsonian Institution

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 Excerpt: .distorted, scattered spicules of this type were found on the surface of a thin-bedded layer of limestone, which closely resemble the oblique spicules from Wales. *P. fenestrata* is represented in the Middle Cambrian fauna of China by cruciform spicules embedded in limestone, that have four slender, round rays meeting at the center of the spicule, but no specimens were found with indications of the skeleton of the sponge. The presence of spicules resembling those of *P. fenestrata* in the Ceratopyge limestone of Sweden is discussed by Moberg and Segerberg and an illustration given (pl. 1, fig. 5), but with the data available it is difficult to determine if the spicules belong to this species or to *P. hicksi* or an undetermined species. The same is true of all the spicules from Swedish Cambrian strata referred to *P. fenestrata* and *P. hicksi* Rauff (1894)! notes occurrence of...
