The University of Chicago Press, United States, 1978. Hardback. Condition: New. Annotated edition. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. The Sourcebook on the Environment, produced in conjunction with the Association of American Geographers, provides a much-needed, objective, and comprehensive guide to environmental studies. Twenty-six specialists have compiled and critically annotated commentaries on the sources treating a broad spectrum of crucial issues, ranging from resource scarcity to the environmental impact of urbanization. Their syntheses of information encompass questions of both long-range value (Environment and the Quality of Life) and immediate utility (Solid Waste and Resource Recovery) as well as thoroughgoing state-of-the-art reviews (Energy and the Environment). Beginning with an introduction to various philosophies and perspectives, the Sourcebook examines major elements of the environment and selected case studies of human alteration of our surroundings. The essential references in each field are carefully presented, and directions are given for examining more advanced and specialized works. Appendixes on selected periodicals, the latest relevant federal legislation, and environmental organizations point to further areas of investigation. To maintain its value in this volatile area, this indispensable work will be periodically revised and updated.
