

What happens to nutrient dynamics when you get land management right

Filesize: 6.14 MB

Reviews

*Completely essential read publication. It is really basic but excitement in the fifty percent of the book. You will not really feel monotony at anytime of your respective time (that's what catalogues are for about in the event you ask me).
(Lexie Paucek PhD)*

WHAT HAPPENS TO NUTRIENT DYNAMICS WHEN YOU GET LAND MANAGEMENT RIGHT

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 28 pages. Dimensions: 9.0in. x 6.0in. x 0.1in. This book entitled What Happens To Nutrient Dynamics When You Get Land Management Right: The East Anglia, England Success Story arose from a study conducted in a temperate ecosystem by an erudite scholar. The work stands listed in other formats and editions at Essex and British Library. Also listed in Google Scholar, PhD Tree amongst other International Indexing. The work is rich in information, data, results and recommendations that cover over 8050 years of English Agriculture and projected beyond 2055. Amongst the areas of expertise covered in chapter one are: agricultural land management in UK, soil biodiversity, C-cycle, C-sequestration, N-cycle and N-fixation; soil health, soil biological properties whole ecosystem and soil respiration, microbial biomass, enzyme activities. Others are humic matter in soils, influences of environment and agriculture, origins, composition and structure of humic substances, isolation of humic substances from soil, purification and fractionation of extracts; impact on agriculture and the environment. In this section is also introduced the place of modelling in environmental monitoring and prediction, the Century 4.0 model; RothC model; soil C turnover, sequestration and microbial respiration and the aims and hypotheses of the study. In chapter two, the work details the materials and methods; site description namely: Wivenhoe Park; Writtle College; grassland farming at Writtle, woodland and protected areas, soils of college farms, soil analysis; design of study site; weather and climatic information of the study area. Others include: field methods and laboratory protocols; soil physical and chemical properties; in-situ measurement of soil respiratory activity, laboratory measurement of soil respiratory activity, estimation of microbial carbon, soil enzyme activity; cellulose activity; phosphomonoesterase activity; urease activity; quantification and qualification of soil humic acids; extraction and purification of humic...
