Reviews

Without doubt, this is actually the best job by any publisher. It is written in basic phrases instead of difficult to understand. You will like the way the author publishes this publication.

It strives to serve all classes of people. In doing this it realizes the necessity of providing for the teaching of many subjects. Languages and Mathematics have been taught in the schools from the time of the first formal organizations and are well established. The sciences have been introduced into the schools within the last fifty years. They are now taught by laboratory methods and are gaining in favor and in effectiveness. The vocational subjects are persistently knocking for admission. So far, except in few places, these subjects are yet unorganized. Their form and content are still more or less problematic. Their worth as disciplinary and informational subjects is unsettled. Enough progress has been made, however, in the organization of these subjects to insure their perpetuation. The University hopes to contribute to the proper organization and development of these subjects in Texas High Schools. In accordance with this desire a conference of teachers of Manual Arts and Household Economics was called to meet at the University, May 5, 1911. In response to this request a number of the best teachers in Texas met and spent an entire day in consultation. The names of these teachers, the names of the institutions attended by them, and the names of the towns in which they are working, are given: E.S. Blackburn (Bradley Polytechnic Institute), Austin; Miss Martha T. Bell (Drexel Institute and Teachers College), College of Industrial Arts; E.M. Wyatt (Kansas State Normal and...
