## PROBLEMS AND METHODS FOR LITHOSPHERIC EXPLORATION (PAPERBACK)

Springer-Verlag New York Inc., United States, 2011. Paperback. Condition: New. 1984 ed.. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This volume contains several contributions among those held at the fourth Course of the International School of Applied Geophysics, Erice, March 15-24, 1982. The content has been arranged according to the three main topics covered during the course: the geodynamic models, the contribution of geophysics to their construction and the optimization and constrains of the exploration methods. At the end of the volume, four short notes are published, written by participants to the course and related to the general subject. It is regrettable that not all the lectures and discussions are available for publication in this volume. However, it is hoped that the papers presented here will stimulate further discussions and suggest new topics for future meetings.
