

Software Architecture: System Design, Development and Maintenance

By -

Springer. Hardcover. Condition: New. 237 pages. Dimensions: 9.3in. x 6.3in. x 0.8in. This volume represents some of the latest work by researchers and practitioners. The papers were presented at the 3rd Working IEEEIFIP Conference on Software Architecture (WICSA3), which was held in conjunction with the 17th World Computer Congress, sponsored by the International Federation for Information Processing (IFIP), and which convened in Montral, Qubec, Canada in August 2002. WICSA3 is a working conference, with paper sessions for presenting new results from research and practice, and working sessions for identifying new research directions. The papers were organized into five sessions. Two of these sessions, Dynamic Software Architectures and Component-based Architectures, contain papers that focus on a particular architectural style and its properties. The remaining sessions, Architecture Analysis, Architecture Description, and Architecture Reconstruction and Evolution, contain papers that describe new approaches and techniques related to software architecture. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Hardcover.
